BELZONA[®]
Repair • Protect • Improve

The application was carried out by the Belzona Distributor's staff trained and validated to design and apply ISO/ASME compliant wrap solutions. After the application of the Superwrap II system, Belzona 5811 was used to provide a smoother finish to the repair which eventually was coated with a blue polyurethane coating following the customer's specification for water pipes. The Concrete wall was rebuilt with Belzona 4131.

Belzona Facts

Customer wanted an ISO/ASME compliant repair system able to stop the corrosion, return the mechanical strength back to the pipes and designed to provide a 20 year lifetime. The application online of the Belzona Superwrap II system avoided any water supply interruption. More than 30 other smaller compliant repairs were carried out at the same facility with Belzona Superwrap II.
