Problem

An irregular shim is required to secure the wear plates once levelled and bolted in place.

Photograph Descriptions

* 1. The Rolling Mill 2. Testing of the Belzona 1321 injection 3. Wear plate 4. Belzona 1321 injection in action ,

Application Situation

Customer needed to change wear plates on steel rolling mill.

Application Method

Application was carried out in accordance with Belzona System Leaflet GSS-9.

Belzona Facts

Wear plates have to be adjusted, tightened and then Belzona 1321 injected to create irregular shim between plate and mill frame. This is a routine application for Belzona 1321 which demonstrates excellent compressive strength required for this application.
