

Belzona Repairs and Protects a Corroded Feeding Pipe

ID: 7811

Industry: Chemical & Petrochemical
Application: VPF-Valves, Pipes and Fittings
Substrate: Carbon steel
Products: * Belzona 1212 ,
* Belzona 4341 (Magma CR4) ,
* ,

Customer Location: Petrochemical Plant, France
Application Date: November 2018

Problem

The pipe was perforated due to corrosion and sulphuric acid was leaking out.

Photograph Descriptions

- * Before application. ,
- * After Belzona 1212 to plug the leak. ,
- * Belzona 4341 applied with reinforcement sheets. ,
- * Final application. ,

Application Situation

Emergency repair on a feeding pipe circulating sulphuric acid into a storage tank.

Application Method

The leak was plugged with Belzona 1212 in order to secure the pipe. The surface was then manually prepared and Belzona 4341 was used with a reinforcement sheet all around the pipe to reinforce its structure and protect it against acid, in accordance with Belzona system leaflet VPF-11.
