

Corroded Weighing Bridge Repaired and Protected

ID: 7870

Industry:

Customer Location: Ghana

Application:

Application Date: October 2018

Substrate: Carbon steel checker plate

Products: * Belzona 1111 (Super Metal) ,
* Belzona 5231 (SG Laminate) ,

Problem

The Customer had an existing weighbridge to determine the amount of Liquefied Petroleum Gas (LPG) leaving the plant on trucks, the corroded weighbridge undermines the accuracy of the data derived from the weighbridge. The worn out surface of the weighbridge was also a safety issue, the Customer has used other surface protection products that failed within a very short period so they opted for Belzona solutions because of the proven durability.

Photograph Descriptions

- * Corroded surface of the weigh bridge Original weighbridge. ,
- * During application on the weighbridge checker plate. ,
- * Belzona 1111 being applied to rebuild lost metal. ,
- * Belzona 5231 being applied to prevent further wear and corrosion. ,

Application Situation

Weighbridge checker plate at a petrochemical plant, LPG/Gas Terminal.

Application Method

Application was carried out in accordance with a modified version of Belzona System Leaflet FPA-3 for protecting floors and drains against chemical attack. Belzona 1111 was applied to rebuild the lost metal after surface was blasted with Bristle Blaster. Belzona 5231 was then applied as a heavy-duty protective coating and to protect against further corrosion.

Belzona Facts

According to the information gathered during the visual inspection, Belzona 1111 and Belzona 5231 out-performed all the other
