- * 2. View of the external pipe before surface preparation ,
- * 3. View of the internal hawse pipe after surface preparation with the MBX bristle blaster ,
- * 4. Finished application with Belzona coatings applied ,

Application Situation

Protection of a hawse pipe on a yacht using the a Belzona elastomer.

Application Method

The internal pipe was prepared using an MBX Bristle Blaster and then cleaned. Belzona 2911 was then used to condition the substrate before 2 coats of Belzona 2131 were applied to prevent further corrosion and wear damage from the chain.

Belzona Facts

The customer chose to go with Belzona as the coating offered good erosion and corrosion resistance even in the presence of sea water which was essential for them.
