

Belzona Batch Mixer Lining

ID: 8089

Industry: Food & Drink
Application: VPF-Valves, Pipes and Fittings
Substrate: Steel
Products: * Belzona 1321 (Ceramic S-Metal) ,

Customer Location: Flintshire, United Kingdom
Application Date: February 2019

Problem

Previously Belzona completed corrosion and pitting repairs on some batch mixers for this customer. They fabricated a new mixer, and wanted to prepare for any corrosion and pitting in the future which is intensified by the production of Chloride during the mixing process, by lining the mixer with Belzona products.

Photograph Descriptions

- * 1. The vessel being transported into the Belzona Technosol workshop, ready for work to begin. ,
- * 2. The inside of the vessel before being cleaned and blasted, ready for the coating. ,
- * 3. The first coating of Belzona 1321 Grey ,
- * 4. The finished application, after the second coating of Belzona 1321 Blue. ,

Application Situation

New fabricated batch mixer lining for a food production facility by Belzona.

Application Method

The vessel was grit blasted to SA2.5 at 75μ, then lined with the first coat of Belzona 1321 to the required thickness, at the recommended coverage rate of (1.14 m²)/kg in accordance with Belzona Know How System Leaflet VPF-02. Due to the dimensions of the tank, a brush was used for the application. The second coat was then applied, and allowed to cure overnight.
