

# Belzona lines an Air Receiver

ID: 8142

Industry: Oil & Gas

Application:

Substrate: Carbon Steel

Products: \* Belzona 1391 (ceramic HT) ,  
\* Belzona 1111 (Super Metal) Nozzle Inserts ,

Customer Location: Danish sector of the North Sea

Application Date: November 2019

## Problem

*This redevelopment of the platform is to allow the field to operate for an additional 25 years. Therefore, a long term solution is required to protect the internal surface of this pressure vessel*

## Photograph Descriptions

- \* 1 General View of Vessel ,
- \* 2 Vessel after grit blasting ,
- \* 3 Application underway ,
- \* 4 Application completed ,

## Application Situation

Newly fabricated air receiver is part of the Tyra redevelopment project where production is expected to recommence in July 2022 at a rate of around 60,000 boe/d, with two-thirds of the production expected to be gas and the rest oil.

## Application Method

The application was carried out using a combination of standard paint brushes, the Belzona applicator and the Belzona Squeegee brush developed in the Belzona Asia pacific facility in Thailand
