Substrate: Steel
Products: * Belzona 1341 (Supermetalgilde) ,

Customer Location: Lancashire, UK
Application Date: January 2019

Problem

New pumps requiring internal protection prior to going into service

Photograph Descriptions

- * New pump components delivered for protection ,
- * Pieces grit blasted ,
- * Completed application of one of the pieces ,
- * Completed application ,

Application Situation

The client manufactures equipment for the mining industry and required a protective coating to be applied to seven new sea water pumps. They were looking for a system which provided outstanding erosion protection along with efficiency enhancement.

Application Method

The application was undertaken in accordance with CEP-01. The pumps were delivered to the Belzona workshop in Wrexham where the team grit blasted the components to SA 2 ½ with a minimal profile of 75 microns. Each of the internal areas were then coated with two coats of Belzona 1341 and allowed to cure prior to returning to the client.
