

BELZONA STRUCTURAL REFURBISHMENT OFFSHORE

ID: 82

Industry: Oil & Gas
Application: RPA-Roof Problem Areas
Substrate: Steel
Products: * Belzona® 3111 (Flexible Membrane System) ,
* Belzona® 1111 (Super Metal) ,

Customer Location: Oil Production Platform in Saudi Arabia
Application Date: April 1995

Problem

The control rooms require complete encapsulation (roof and sides) to prevent water penetration. The structures are subject to constant salt water spray and wave splash.

Photograph Descriptions

- * Applying the first coat of Belzona® 3111. ,
- * First panel done. ,
- * The completed structure protected from the rigours of the offshore environment. ,

Application Situation

Water-proofing of control rooms for offshore oil-gas separation plants

Application Method

The application was carried out in accordance with Belzona Know-How Leaflets RPA-1 and TCC-1.

Belzona Facts

The customer could have replaced the defective sheets with new ones but the use of a Belzona repair method saved considerable time and also afforded protection to the existing structural components.
