

Belzona Repairs and Protects Pipe Tee for Mixed Aldehyde

ID: 8261

Industry: Chemical & Petrochemical
Application: VPF-Valves, Pipes and Fittings
Substrate: Stainless steel
Products: * Belzona 1593 ,
* Belzona 1111(Super Metal) ,

Customer Location: Shandong, China
Application Date: October, 2019

Problem

There is leakage at the pipeline weld, which needs to be repaired and reinforced.

Photograph Descriptions

- * Surface preparation ,
- * Belzona 1593 offers corrosion-resistance protection ,
- * Belzona 1111 applied to reinforce pipeline ,
- * Application complete with fitting applied ,

Application Situation

DN40 pipe tee, with a pressure of 0.78MPa. Material is mixed aldehyde at ambient temperature.

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflet VPF-11. First, the leaking area should be sealed after surface preparation; Then, Belzona 1593 was applied to protect the pipeline from future corrosion; And last but not least, Belzona 1111 was applied to reinforce the connection area between fixtures and the pipeline.

Belzona Facts

Belzona corrosion-resistance coating offers excellent chemical resistance protection and easy application which allows on-site application. The solvent-free cold bonding material does not require hot work, and has excellent strength and adhesion between metal surface and the coating, which can restore equipment integrity and provides reinforcing protection.
