

Turbo Separator Repair With Belzona 1818

ID: 8480

Industry: Pulp & Paper
Application: SHM-Solids Handling Machinery

Customer Location: Brisbane, Australia
Application Date: March 2021

Substrate: Basalt Tiles
Products: * Belzona 1818 ,

Problem

The Turbo Separator is a disc screen specially designed for course screening, primarily removing light and heavy impurities from wastepaper. The unit is lined with thick Basalt tiles and has a hard-wearing grouting compound applied over the joints between the tiles. Over the years, this grouting compound would wear away leaving the joints unprotected. This is a very abrasive environment.

Photograph Descriptions

- * 1. Worn grouting system ,

BELZONA®
Repair • Protect • Improve

After cleaning out the pulp, the Turbo separator was dried out using rags. Surface preparation was achieved using a diamond blade on an angle grinder to create a "key" for Belzona 1818. Belzona 1818 was mixed and applied with ease, including overhead areas.

Belzona Facts

Previously, Belzona 1812 was used to repair this turbo separator. Belzona 1818 provided: - Easier vertical and overhead application - Lower surface preparation needs - Quicker back to service - Time and cost savings.
