

TANK BASE SEALING WITH BELZONA SOLUTION

ID: 878

Industry: Power
Application: GSS-Gaskets, Seals and Shims
Substrate: Carbon Steel/ Concrete
Products: Belzona® 3111 (Flexible Membrane)

Customer Location: Coal Fired Power Plant, Missouri
Application Date: 2007

Problem

Moisture was seeping through the concrete tank pad and collecting under the tank. Plant officials feared that the tank bottom would be compromised by subsequent corrosion.

Photograph Descriptions

* Chime angle before application , * Application underway , * View of tank size , * Completed Application ,

Application Situation

Large oil tank

Application Method

Application was carried out in accordance with a modified version of Belzona Know-How System Leaflet GSS-3

Belzona Facts

Other products had failed to seal the chime angle. Plant engineers were needing a reliable product that would adhere to both substrates. Belzona was chosen for its ease of application and excellent reputation. The application was completed quickly and effectively.
