Application Situation

A pipe at a pump station for the dyke protection had heavily corroded.

Application Method

The heavy corroded areas were filled and smoothed with Belzona 1111. Belzona 5811 was used to coat the internal and external of the pipe for further corrosion protection.

The application was carried out in accordance with Belzona System Lealeaft VPF-03

Belzona Facts

Saved the client replacing the pipe, a relatively quick procedure to repair and coat with Belzona and return back to service.
