

# BELZONA PROTECTS A CONTAINMENT AREA

ID: 8922

Industry: Power  
Application: FPA-Floor Problem Areas  
Substrate: Concrete  
Products: Belzona 5811 (Immersion Grade)

Customer Location: HPP Banje, Gramsh  
Application Date: April 2021

## Problem

The Hydropower plant required a protective coating for the transformer oil containment area . The coating should be able to withstand oil penetration in concrete in case of leaks from the transformers.

Containment Area after application

Accessing floor also coated

## Application Situation

Protection of deteriorated floors and walls in oil leaks containment areas.

## Application Method

Application carried out in accordance with Belzona System Leaflet FPA-3.

## Belzona Facts

The floor had started to deteriorate due to oil and water ingress. The client analysed and tested several materials with no results. The physical and mechanical properties including adhesion testing of the Belzona provided the reassurance the client needed to select Belzona for protection and to ensure that coating would have the required longevity.
