BELZONA PROTECTS A CONTAINMENT AREA

Industry:PowerApplication:FPA-Floor Problem AreasSubstrate:ConcreteProducts:Belzona 5811 (Immersion Grade)

Customer Location: HPP Banje, Gramsh Application Date: April 2021

Problem

The Hydropower plant required a protective coating for the transformer oil containment area. The coating should be able to withstand oil penetration in concrete in case of leaks from the transformers.

Containment Area after application

Accessing floor also coated

Application Situation

Protection of deterioreated floors and walls in oil leaks containment areas.

Application Method

Applicaton carried out in accordance with Belzona System Leaflet FPA-3.

Belzona Facts

The floor had started to deteriorate due to oil and water ingress. The client analysed and tested several materials with no results. The physical and mechanical properties including adhesion testing of the Belzona provided the reassurance the client needed to select Belzona for protection and to ensure that coating would have the required longevity.
