- * One of the areas of galvanic corrosion ,
- * Forming the repair ,
- * Repair completed, perfectly formed flange face ,

Application Situation

The fresh water maker started to leak

Application Method

Application completed in accordance with Belzona System Leaflet VPF-13.

Belzona Facts

Weld repair would have damaged more of the existing coating and onsite machining would have had to be used to reinstate the sealing faces and the bore of the nozzles. Time was key factor as this was an emergency repair situation.
