

Belzona protects GRP water tanks

ID: 9414

Industry: Local Authorities & Municipalities
Application: TCC-Tanks and Chemical Containment Areas
Substrate: GFRP
Products: Belzona 5811DW (DW Immersion Grade)

Customer Location: Scotland
Application Date: June 2016

Problem

Two GRP cold water storage tanks were in need of relining to protect the substrate & bring up the hygiene standards of the tanks.

Before internal

Complex geometry

During inspection

Completed application

Application Situation

Removal of the tanks was impossible to remove due to the location within the building. The only option was renewing the condition of the tanks in place.

Application Method

The tanks were grit blasted to clean & prepare the GRP substrate. Two coats of Belzona 5811 DW2 were then applied.

Belzona Facts

The tanks were completed in two weeks with minimal disruption to the operations within the building.
